ABOUT US

Our goal at Xpozit is to exceed clients' expectations in terms of their projects.

Either as it refers to showroom displays, shelves, merchandising systems or magnetic panels for changing the existing boards in the locations.

We have 10,000 square meters of workspace at our disposal, located in our factory, with easy access from Bucharest Ring Road.

Xpozit's objective is frankly common.

We constantly try to offer our clients the chance to benefit from quality and promptitude, keeping an ongoing partnership with them through the sales department.

We always explore the customers' needs, and as a result, we are able to identify the best solutions.

We constantly try to blend imagination with engineering harshness and quality with innovation.

This is how Xpozit can be so different on the market.

We know that each client, each brand, and each project is unique. For this reason, we propose a tailor-made design solution for each of them, trying to fit them most properly. Ultimately, our product needs to suit project characteristics and customer style perfectly.

We carefully pick up all the details from our clients. After we gathered all the information, emotions and ideas behind the project, we are ready. And all of that guide us to a perfect creative process capable of spreading the customer message into the market in the most effective way.

Xpozit offers a complete line of displays with a metal structure, synoptic panels, mobile panels, floor displays, shelves and ceramic tiles.

We also provide a turnkey solution for all services that our clients may request, from surveys and market studies to project enactment in locations and maintenance for the delivered products.

Here at Xpozit, we have no limits!

Our organization is extremely flexible and well-prepared to allow the manufacturing and delivery of any order.

We don't have "a minimum limit" in our vocabulary!

We all work in a fluid market where technology evolves overnight, improving technical solutions.

Our competitive advantage is our passion for research and innovation, which is behind our outstanding projects and high-quality finished products, which bears the Xpozit signature!

We offer our clients a Commercial Department that ensures an ongoing relationship with the client and an effective organization of material processing strategies, assembly and after-sales assistance services.

Xpozit expresses innovative planning, customization of display solutions, high-quality materials and finishing in the tiniest detail.

Our passion!

Design

Our design team can offer you the most innovative projects.

Product development

We can create and adapt any display model to meet any customer requirements.

Survey

We can offer our customers complete information about stores all over Romania.

Production

Displays and ambient magnetic stalls

We offer our clients a complete range of solutions of product advertising:

- magnetic panels for ceramic and mosaic tiles
- magnetic displays for ceramic and mosaic tiles
- synoptic panels - both in the classic version and with magnetic system
- mobile panels
- floor displays
- exhibition shelves for ceramic tiles
- display systems of the pottery type
- stalls systems and magnetic ambience

Installation

We cover most of the countries in Central and Eastern Europe, including Romania.

Our commissioning teams and comprehensive logistics line ensure installation at any point described above.

Maintenance

We can cover any location in Central and Eastern Europe for maintenance.

In an emergency, we guarantee our presence for remedial works within 72 hours after the report.

15 years of experience

+10.000 Product displays

Product displays
Metal structure displays, laminated wood displays, shelves and customized systems.

220.000 mp Printed sticker

Our machines can realize different types of printing at maximum resolution, customized colour profiles, design and DTP preparation for your layouts.

1.600.000 kg Over 1600 tons of ceramic tiles

The average weight of ceramic tiles applied to panels within a single project and delivered to final customers.

300.000 km Average distance travelled by our teams.

We supply to most East-European countries. We have already installed in Romania, Hungary, Bulgaria, Serbia, Croatia, Greece, Bosnia, Montenegro, Macedonia and other countries.

+150 Our people

We have a team of designers, technical experts, workers and installation teams with experience and professionalism, able to execute our clients' projects to the most elevated criteria.

+75.000 Panels supplied and installed

The average number of panels enforced on sites

The Xpozit Magnetic Panel system is a patented invention protected by the patent cooperation pact.

About Xpozit

Xpozit is the business line of the BD Lemntech group of companies. Xpozit provides innovative showroom display solutions for the ceramics and flooring industry.

The company owns and operates its production capacities for wood and metal-based displays and also has well-trained commissioning teams, which performs in 12 countries from southeast Europe and Romania as a head office.

We are proud of the experience achieved in recent years, with a complete range of latest-generation machinery for woodworking, with machines for processing metals, but also with the printing facilities “in

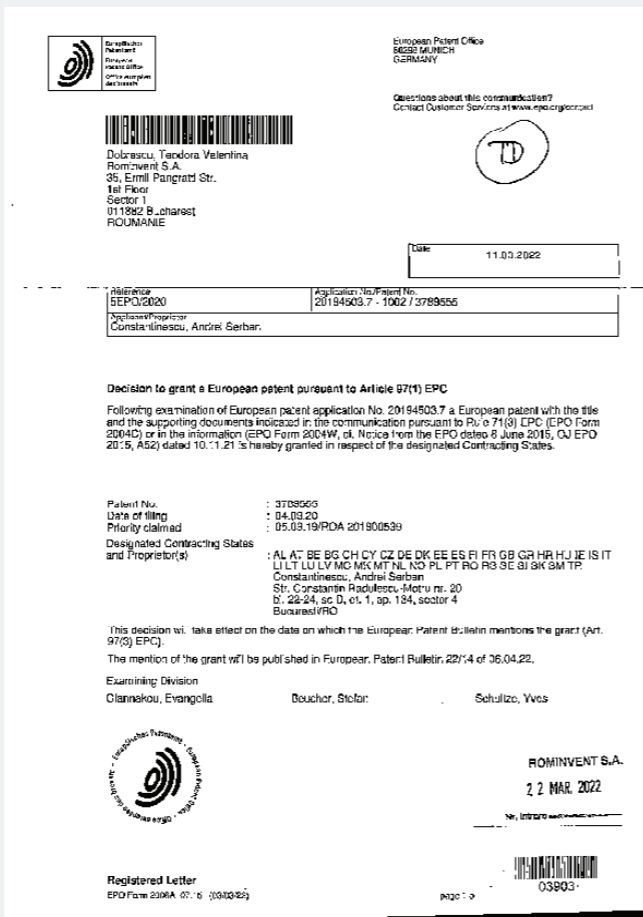

house”, operated by a trustworthy team of specialists.

Xpozit aims to be distinguishable from other players performing in the same industry. Because we deeply understand the sales process, we provide complete design solutions.

We use our knowledge and experience to create a perfect link between the client’s product and the showroom space, offering the chance for the client to have the best achievable visibility at the POS.

Our solution, Xpozit Magnetic Panel System, is a factual illustration of this. This one comes to substitute the standard synoptic panel and the presentation stands from the showroom.

In this sense, we present to you below our patents.

Let me introduce you Xpozit Magnetic Panel System!

The Xpozit Magnetic Panel System is a new type of display panel. This versatile system rethinks the whole POS ceramic display process.

The magnetic panel system replaces the traditional way of presenting ceramic tiles stuck on a display board, with a versatile magnetic panel that will never be replaced. Whenever a ceramic tile collection is updated, the magnetic panel remains in place, and only the tiles and ambient image are replaced.

Ceramic tiles and the ambient image are magnetically attached and, therefore, both can be easily changed when a new collection comes.

The system comes with many significant benefits in terms of speed of commissioning, minimal logistical

expenses for product exposition, the opportunity of replacing even a single plate in the panel, the minimal pressure for the POS during a new tiles collection replacement.

This system reduces the time from the ceramic factory to the POS presentation for new collections. We are discussing an ecological product, because the panel is no longer replaced at every update collection.

And last but not least – significant cost savings for the budget of the new stoneware collection.

MAGNETIC AMBIENCE

The new Magnetic Ambience

Almost every showroom has one or more presentation stalls. This is where the merchants can display and combine the ceramic tiles with sanitary items and create an example of a mini-environment.

We used the innovative magnetic panel system for such a presentation stall. Now we have a complete kit, and creating a mini-environment is easier than at any time. Anyone can ensemble it in a short time, without the mess. And with this innovative kit, our customers can change the ceramic tiles as often as they want with minimal effort.

The magnetic kit contains

1. Ultralight magnetic panels

- The magnetic system is also applied in environments, the light panels being the most convenient solution for obtaining the maximum advantage in a short time, effortless

2. U-type closing profiles

- The panels are fixed with aluminium profiles

3. Magnet for ceramic tiles

- Adapted to any board size

4. Special fittings for sanitary items and furniture

- The metal elements are designed for fixing any product - from cabinets and mirrors to toilet bowls and sinks

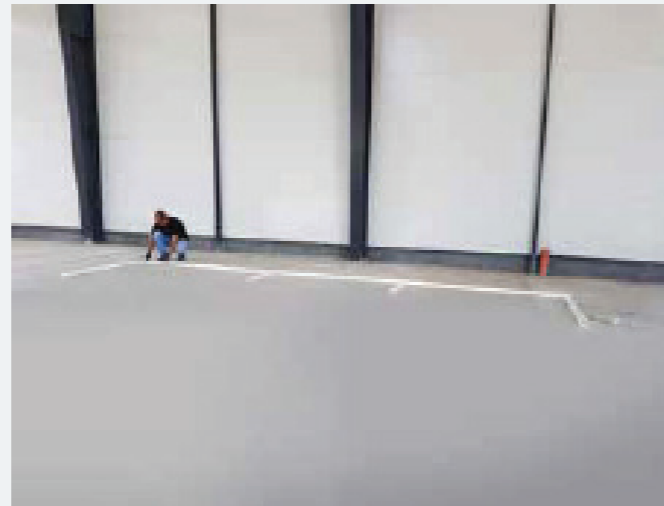

Models of "magnetic ambience" for the showroom
They can be executed in any other combination

THE SYSTEM OF MAGNETIC AMBIENCE APPLICATION TO TILES, FURNITURE AND SANITARY OBJECTS

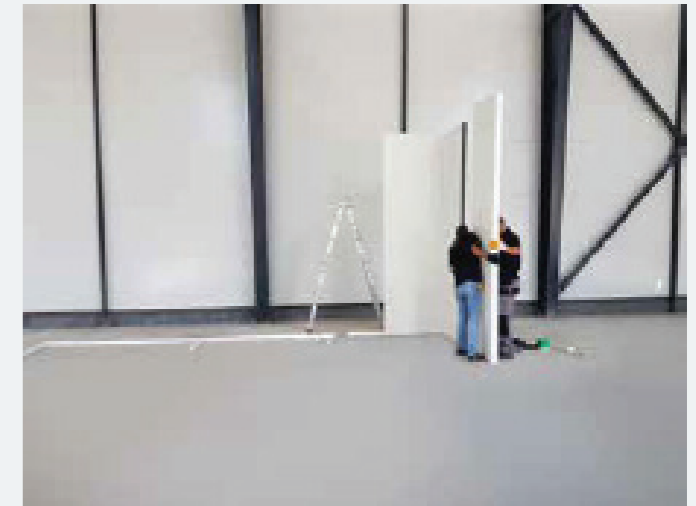

1 Build the frame of the Magnetic Ambience using profiles from the magnetic kit.

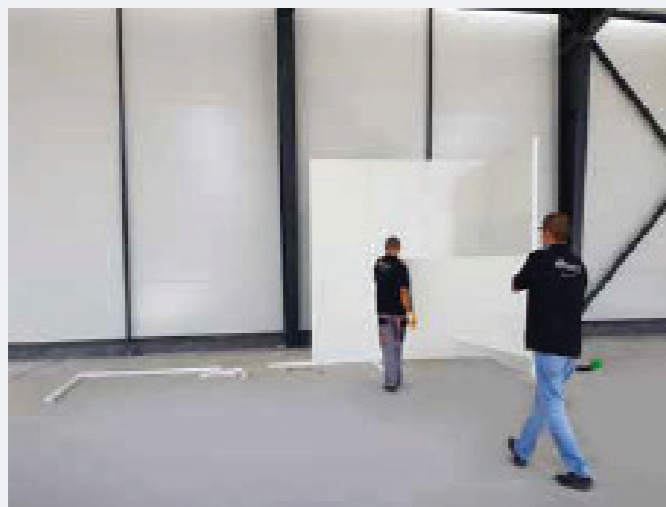

2 The kit will be assembled according to the footprint of your stall. The system is modular and can be reconfigured at any time.

3 The panels slide into the base profiles. No technical experience is necessary for the installation of the magnetic system

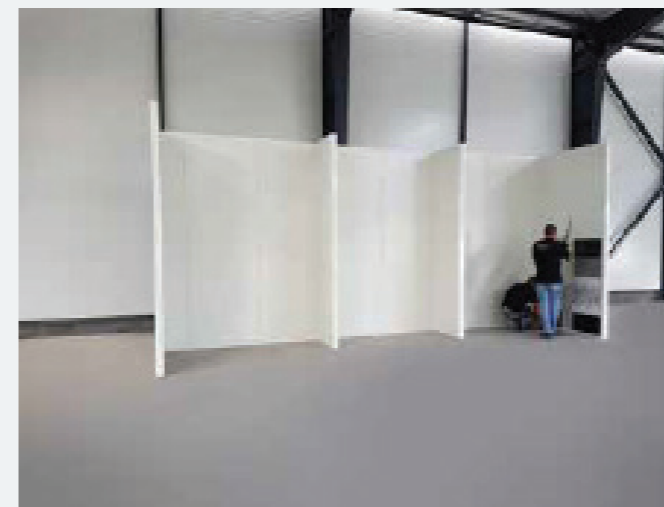

4 The panels are installed in the base frame using the interlock-type fixing system.

5 Installation can be done with only 2 people. Because the panels are ultralight and we don't have to involve special transport equipment.

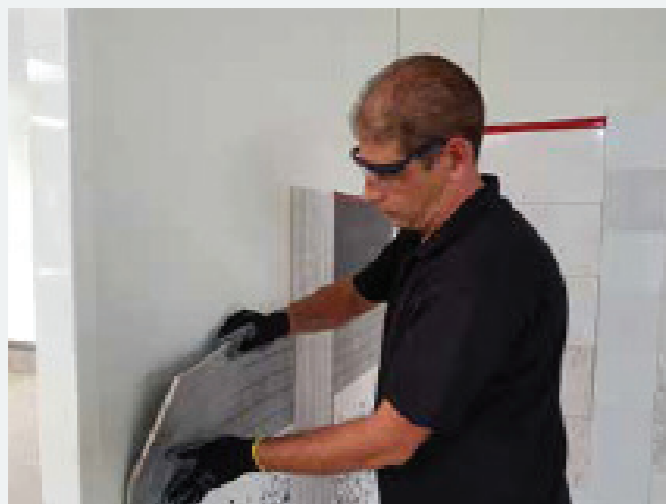

6 The final image of the magnetic ambience

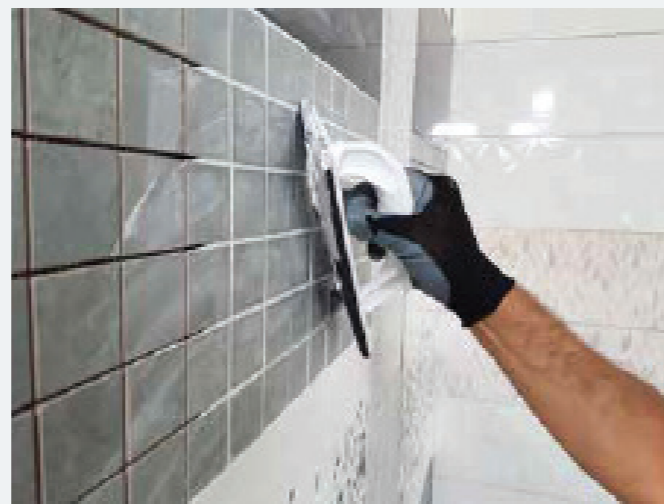

7 After assembling the panels, the team starts applying the ceramic tiles

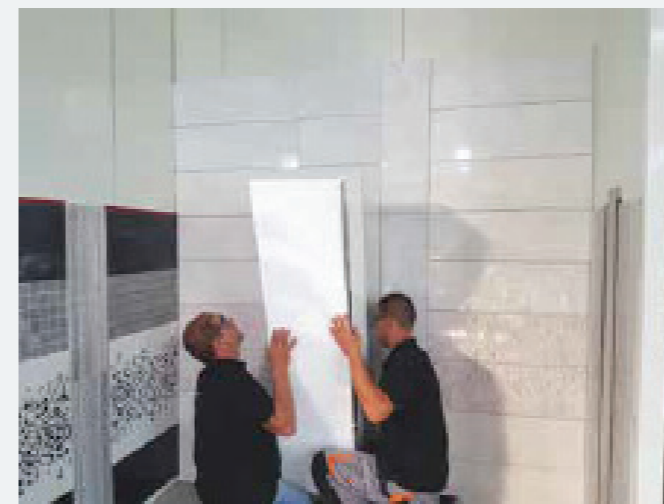

8 The application is made in a short time, and the result is easily seen

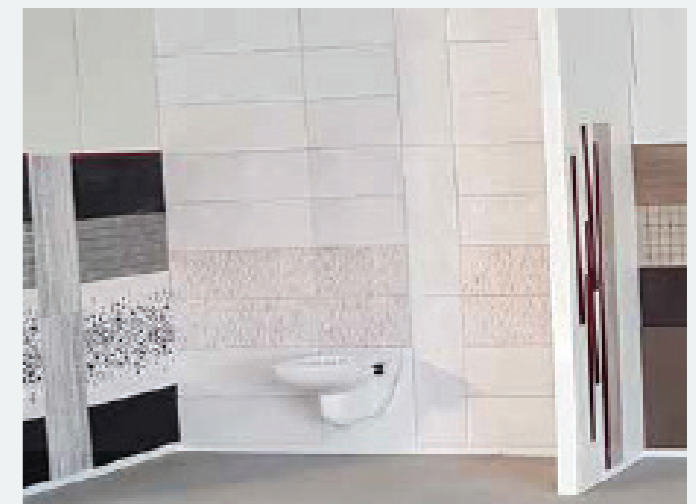

9 The last plates are applied - the system works with all formats. In the picture, the worker installs mosaic tiles.

10 After installing all the boards, you can apply the joint putty. The system allows the application and removal of joint putty without traces or dirt.

11 The furniture can be installed using the magnetic system.

12 Sanitary objects can be applied easily.

This is the new Magnetic Ambience System.
It optimizes the space and exhibits effectively.
It innovates and brings a new image.

DIY MAGNETIC SYSTEMS

DIY stores

The magnetic panel system also proves its usefulness for type shops DIY, where it can be used mainly in tile sales.

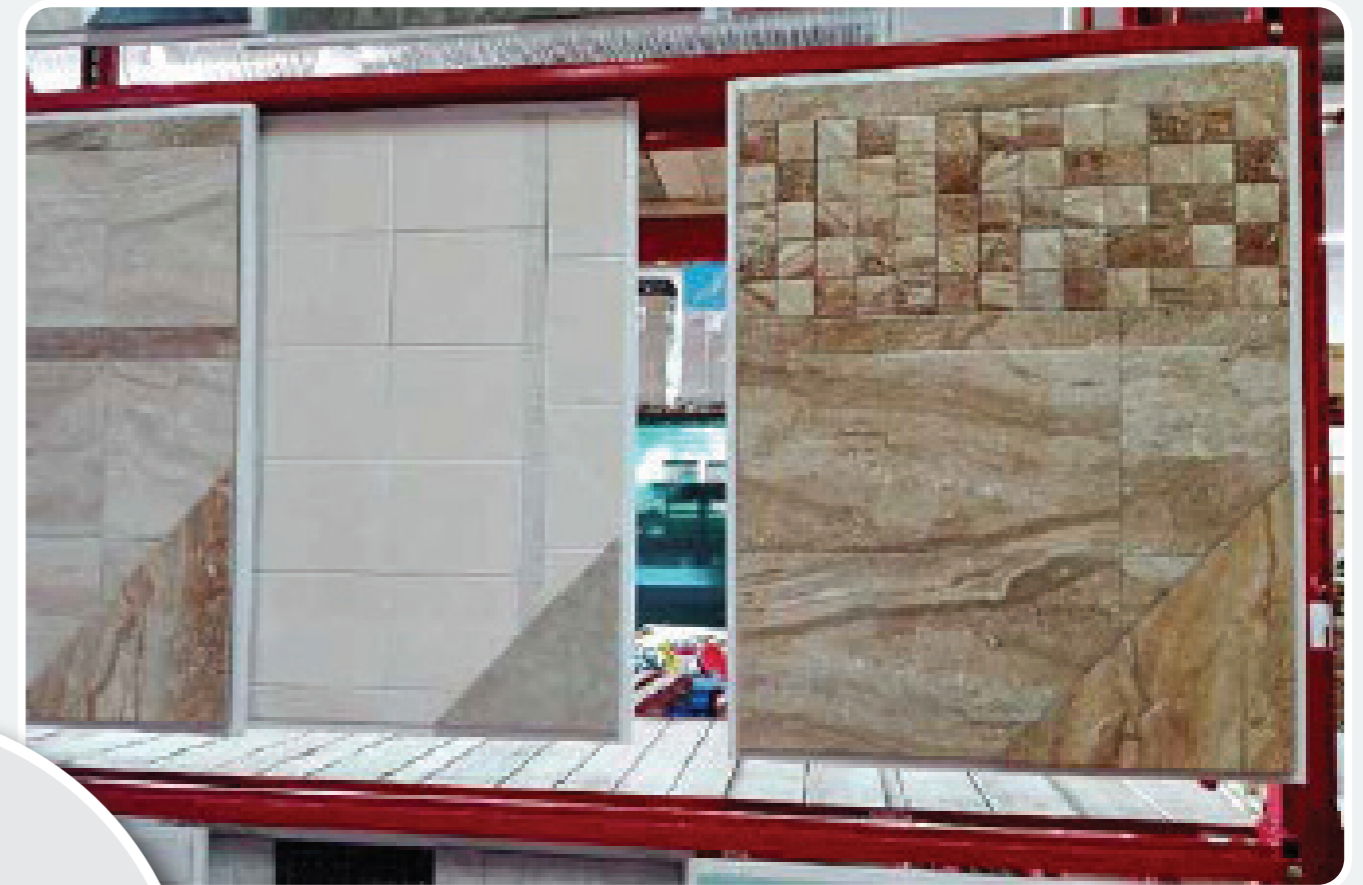

The magnetic panels can be applied instead of the display panels on the systems cantilever without changing the existing structure of the shelves.

In this way, the modification and combination of collections on these panels can be done quickly and without additional effort on the part of the store.

The magnetic panels can be made in any size to fit the allocated space. They can be mounted on the existing roller system. The lightweight magnetic panel system has been tested and is guaranteed to withstand shocks, sudden movements or blows.

Store employees can easily do the replacement of ceramic tiles without additional tools.

Magnetic panels for shelves can be made in any other size

Comprehensive services for your company!

We deliver the most suitable solution for displaying ceramic products - the Magnetic Panel System. That is why our SERVICES guarantee that we are trustworthy partners.

DESIGN

We continuously think of new presentation paths and functional systems that combine aesthetic appeal, ergonomics, cost and durability.

PRODUCTION PLANNING

We work with our customers to design projects that faultlessly suit each store's needs and are delivered to the market in the quickest possible time.

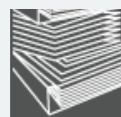

SERIES PRODUCTION

We carefully observe all production phases, from raw materials to the final product. We do not have a minimum order quantity. For us, every customer is important.

DELIVERY AND INSTALLATION

Easy to install and operate, our patented methods are enforced throughout Romania and Central and Eastern Europe.

ANALYZE

We pick the most suitable materials, use high-performance equipment, mix fashion with technology and offer a product that reflects innovation and functionality at the highest benchmarks.

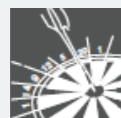

MAINTENANCE

Our professionals assure rapid intervention in less than 72 hours in any store from Central and Eastern Europe, Romania included. We know the quality of our work and guarantee the quality of our products.

SURVEY

We can provide our clients complete information about any store from our area of interest - starting from the number of manufacturers in the POS, the total size for display and the logistics unrestricted in that store. And, finally, contacts!

RESULT

As a result, we provide a perfect partnership which can fulfil all the requirements of exposure and communication at the last point of sale.
